SKILLS

- Used JavaScript, TypeScript, C#, HTML5, CSS and PHP to build high quality web apps.
 - Used Git/GitHub in collaborative team projects to manage code and track code history.
 - Fluent in using Laravel, .NET 5/6, ExpressJS, ReactJS, NextJS and Apache/PHP stacks to run and manage web applications.
 - Experienced with Framer Motion and Moti for React Native to create advanced front-end applications with animations.
 - Worked in different roles to create and design both back-end and front-end systems.
-

EDUCATION

Diploma : Full Stack Web Development, **BCIT** - Vancouver, BC, just graduated in 05/2022

Relevant courses: OOP Programming, Agile Software Development, Web Development,

PROJECTS

BCIT Projects

- WTF is That Noise?: Car Diagnostics app (Jan 2022)
 - WTF is That Noise uses machine learning algorithms to identify the broken part of your vehicle and provide repair quotes specifically for your make and model.
 - It's not just a diagnostic tool: it can also help you find a certified mechanic through video call, so you can get your car fixed without having to worry about being taken advantage of or overcharged.
- Speakify: Auto note taking app (Feb2022)
 - As our final project for our MVC class, we create a note taking app which utilizes Azure Cognitive Services to turn voice into text.
 - We also used a markdown Text editor so that users can prettify their notes and save images in between.
 - This app uses a React front-end and a .NET 6 backend system.
- Dev House: Twitter Clone (Feb2021)
 - As our final project for OOP course, we created a clone of Twitter with the fully secure authentication and posting system in a team of 3. I used EJS and jQuery to design the front-end landing page and Typescript for the back-endserver.

WORK HISTORY

CUSTOMER SERVICE SPECIALIST (Fresh St Market, Vancouver, BC) 12/2019 to 06/2021

- Earned the employee of the month award for "Best peer worker" for having strong communication skills and making a friendly work environment.

ACCOMPLISHMENTS

- ✓ First Place in Tehran's provincial video game designing competition.
- ✓ Third place for two years in a row in Salam Cup tournaments. (2016-2017).
